Providence, RI 02912

Dear David:

Many thanks for your very pleasant letter of January 26th. I am extremely grateful to you for sending me the Lovectaft book. We have managed to clear a research position for you in our laboratory this summer, where you would be working closely with Reid Thompson and Bishun Khare. The earlier you can come the better; while I will be gone most of June I expect to be around for a good part of July and August and very much look forward to seeing you then.

With all good wishes,

Cordially,

Carl Sagan
